

SYRINGE ART

STEP 1: PREPARATION

This will be a great activity to do outside so that you can avoid a mess. Use your trash bag to cover the area in which you are working. Place the canvas on the trash bag.

STEP 2: PREPARE THE PAINT

You may want to mix a little water in with the paint in your Syringe Art pack. This helps the paint easily move into the syringe. Careful! You need just a drop or two!

STEP 3: TIME TO CREATE!

Pull the paint into your syringe. You have 3 paint colors and 4 syringes just in case you want to do a color twice or maybe you want to mix a color! Have fun here! The paint will shoot a very long way! Be careful! If you make it really thick, it will take a long time to dry!

STEP 4: TAKE A PICTURE AND SHARE IT

We want to see your creations! Please take a picture and send them to carrie@smileamile.com. Also, tag Smile-A-Mile on Social Media:
